**International Journal of Medical Laboratory Research (IJMLR)** is an international peer reviewed journal devoted towards laboratory research and practices. All the articles published under IJMLR, include high quality papers, which cover all the major field of medical laboratory research. IJMLR keeps updating day-to-day research & development to the scientific niche around the world. The journal publishes original articles, commentary, editorials, letters to the editor, review articles and case report describing original research in the fields of clinical & medical laboratory medicine. It provides a platform for scientists and researchers all over the world to promote, share, and discuss a variety of innovative ideas and developments in Medical laboratory research and clinical experience. IJMLR Journal focused on the publication of current research, review work and rare case reports carried out world-wide. All contributions to the journal are rigorously refereed and are selected on the basis of quality and originality of the work.. The journal welcomes the submission of scientific articles in all fields of medical laboratory sciences including Clinical biochemistry, Hematology, Microbiology, Immunology, Clinical pathology, Medical genetic, Pharmaceutical sciences, physiology and Clinical research. Subject areas suitable for publication will be including as it is limited to the above fields. IJMLR puts a lot of emphasis on publishing original research articles, review work and rare case reports with good images which will help in advancement of all areas of Medical Laboratory Sciences and discourages the publication of articles that merely represent pre-established and repetitive facts. To achieve this objective IJMLR continuously improvises on scientific and technical aspects both. We spend valuable time and resources towards this.
