Introduction

The Introduction presents the purpose of the studies and relationship to previous work in the field. It is not required to incorporate an extensive review of the literature. Use only recent references and provide the most salient information to allow the readers to understand and evaluate the purpose and results of the present study.

Materials and Methods:

The Materials and Methods section should be brief and concise with sufficient technical information. Only new methods should be described in detail. Cite previously published procedures in References.

Results:

The Results section should include the rationale or design, optimization, validation of the experiments as well as the results of the experiments.

Discussion:

Discussion section should focus on the interpretation of the results with proper justification. The Results and Discussion sections may be combined into one section.

Conclusions:

This section should comprise a brief statement of the major findings and implications of the study. It is not the function of this section to summarize the study; this is the purpose of the abstract. New information must not be included in the conclusions.

Tables and figures:

All the tables and figures should be in the text at suitable place. Tables must be created using **Word table format**.

Tables must have titles and sufficient empirical detail in a legend immediately following the title to be understandable without reference to the text. Each column in a table must have a heading, and abbreviations,

when necessary, should be defined in the legend. Please number the tables. Please do not do any row or column merging in the tables.

Figures should have titles and explanatory legends containing sufficient detail to make the figure easily understood.

Appropriately sized numbers, letters, and symbols should be used. The abscissa and ordinate should be clearly labeled with appropriately sized type.

Images or Diagrams should be very clear and high resolution. Blur or tiny images may not accept.

Acknowledgements

In case, if you want to acknowledge your colleagues, scientific/technical staff for their kind support and motivation, and/or you get the financial support from any organizations/agencies, you can mention that details under the “Acknowledgement” section without giving any number to the section.

Conflict of Interest: It is requires that all authors disclose any potential sources of conflict of interest. Any interest or relationship, financial or otherwise, that might be perceived as influencing an author’s objectivity is considered a potential source of conflict of interest.

References and footnotes:

Maximum 35 and 75 references for original research paper/case study and review papers, respectively.

References should be numbered consecutively as they appear in the text. Reference citations in the text should be identified by numbers in superscript after the punctuation marks.
